

WHAT DR. SYMS' PATIENTS ARE SAYING ABOUT BETTER HEARING

"My hearing impairment caused me to be considered very shy. [People] thought I was introverted, and I'm really not! Rather than make a comment that didn't pertain to the conversation, I would keep quiet. Now with the help of Dr. Syms, I hear better and I'm all in!"

Ginger Kuberra, Payson, Arizona

"I called my daughter crying ... I can hear! It gives you your life back. You feel like you're a part of everything. That's the one big message. If you're losing your hearing, get it checked every year. Make sure you're with someone you can trust like Dr. Syms. Don't just go to any hearing aid center. You've got to know you're with someone on the cutting edge like Dr. Syms."

Linda Gotcher, Phoenix, Arizona

"Since I received my hearing aids from Dr. Syms, there's been a remarkable improvement in my ability to hear. I feel much more at ease socially and able to participate much better. It's been a remarkable breakthrough."

Tom Haines, Phoenix, Arizona

"It's a shame I waited so long to investigate [my hearing loss]. If only I had treated it years back. I was a substitute teacher at the elementary school and... [hearing loss] always held me back from improving myself. You shut yourself out even to your friends and family. You just don't feel like you're a part of anything. I thought I'd have to die like this but then we found Arizona Hearing Center and Dr. Syms and it's been remarkable to hear like I do!"

Bonnie Grimm, Phoenix, Arizona

"I suffered sudden hearing loss in my left ear and I was beginning to panic. My right ear was fine but there was no hearing at all out of my left ear. I couldn't hear anything when I put the phone up to that ear and it only created more anxiety and more panic. I knew I had to do something because all of the normal processes to clear my ear were not working. I went to see Dr. Syms and my hearing is back. I'm very thankful to Dr. Syms and God above! Don't wait. The longer you wait to treat sudden hearing loss the bigger risk you have!"

Anthony Cyplik, Phoenix, Arizona

"People have been after me for years to get a hearing aid. My wife got tired of me going, 'Huh? Huh? Huh?' I couldn't hear! It was progressively getting worse and in fact, it was getting worse quicker. After seeing Dr. Syms and the folks at Arizona Hearing Center, my hearing is a lot better. I've been very happy!"

Jim Lochhead, Phoenix, Arizona
